## PRIORITY APPLN. INFO.:

AB The glucose tolerance factor (GTF) is composed of Cr-rich yeast 3-5 kg, NaHCO<sub>3</sub> 0.5%, NaCl 0.5-3%, stabilizer 2-10, Cr<sup>3+</sup> compound 0.12-15, Zn salt 16-96 g, and an appropriate amount of HCl. The blood sugar-lowering tablets contained Traditional Chinese medicine 1,000-2,000 g, GTF 25-500 g, and starch. The Traditional Chinese medicine is selected from astragalus root, Ginseng, figwort, Chinese yam, medlar, radices rehmanniae, cortex lycii radicis, radices puerariae, rhizoma polygonati, scutellaria, *Phellodendron* rupr, pieplant, fructus schizandrae, honeysuckle, rhizoma anemarrhenae, rhizoma atactylodis, radices polygonati officinalis, tuckahoe, lily, radices trichosanthis, etc. GTF also can be incorporated into food.

## BASIC-ABSTRACT:

NOVELTY - The present invention relates to the food and medicine containing glucose tolerance factor chromium, their formulae and production process.

DETAILED DESCRIPTION - The invention relates to a glucose tolerance factor chromium (GTF) extracted from chromium-enriched yeast, added with chromic compound to form a GTF-enriching agent. The GTF enriching agent can be added to Chinese herbal medicine or food, so that the invented products, including the Chinese medicine-GTF enriched melbine, GTF enriched peanut butter, GTF enriched soft sweets and GTF enriched yeast tablet. The invented product possesses obvious effect for reducing blood sugar, and is non-toxic, doesn't result in hypoglycemia, and can be used for curing diabetes, heart disease, hypertension and hyperlipidemia, etc.
